TJMT0Y007

www.tjm.com.au

TYPE 13 OUTBACK

protection bar

- Steel
- Zinc treated & polyester powder-coated
- 4mm steel channel construction
- Full kato straps for additional strength
- Mid tube pipes to protect headlights
- Double welded outer loops

- Improved approach angles
- Dual HF tested aerial mounts
- Polycarbonate indicator/park assembly
- Accommodates large driving lights
- Reinforced T-slot recovery jack points
- Integrated winch frame

- Accommodates a wide variety of winches
- Airbag compatible
- Does not void new car warranty.

TYPE 15 ALLOY DELUXE

protection bar

- Lightweight polished aluminium
- 76mm diameter raised centre section
- Improved approach & departure angles
- Dual HF tested aerial mounts
- Polycarbonate indicator/park assembly
- Accommodates large driving lights
- Polyurethane bumperettes

- Winch frame comes standard
- Accommodates a wide variety of winches
- Airbag compatible
- Does not void new car warranty.

TYPE 16 ALLOY

high loop FUG grille guard

- High grade aluminium
- 76mm diameter tube
- Fits neatly over the original bumper
- Unique F.U.G. plate design
- High polish finish
- Driving light compatible
- Stylish & sporty

- Adds value to the vehicle
- Airbag compatible
- Does not void new car warranty.

STEEL

3/4 side bars & steps

- Steel
- Zinc treated & polyester powder-coated
- 50mm diameter tube
- Engineered mounting system
- Excellent sill protection
- Excellent panel protection
- Excellent flare & wheel arch protection

- Side airbag compatible
- Convenient tread plate step provides easy access to the vehicle.

TJM SIDE STEPS

outback steel

- Heavy duty 50mm diameter steel tube
- Polished stainless steel step tread
- Stylish drilled & countersunk holes
- Heavy duty mounting brackets based on the same construction as used on the TJM 3/4 side bars & steps
- Provides excellent sill protection
- Side airbag compatible

- Step provides convenient and easy access to the vehicle.

TJM ROOF RACK

aluminium & steel

- Aerodynamic design reduces drag
- Fully welded construction
- Lightweight and durable
- Wind deflector standard
- Tested in the outback
- Can be coloured to match or contrast
- Optional mesh floor (Aluminium only)

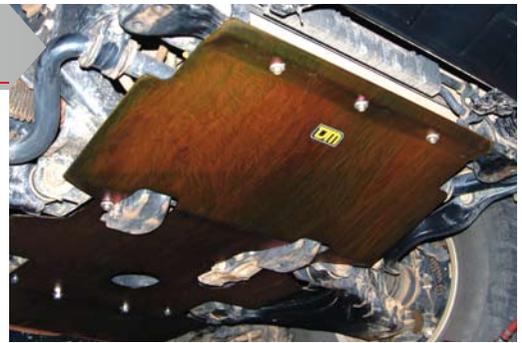

- Available in both alloy and steel.

TJM ACCESSORIES

underbody guards

- 3mm thick Steel
- Provides excellent underbody protection
- Super Alloy 5 finish
- Press folded to increase strength
- Drain access holes for sump and transmission where necessary.

TJM AIRTEC

snorkels

TJM AIRTEC

snorkels

- Fitting a TJM Airtec Snorkel means the air supply is drawn from roof level providing cooler and cleaner air to the engine.
- Because the air supply is drawn from roof level, dust is not as thick and plentiful in the engine bay or inner guard. This will help extend the life of the air cleaner element, reducing the wear of vital components.
- With the sealed TJM Airtec Snorkel, well above water level, you can expect worry free water crossings.

FEATURES & BENEFITS

- TJM Airtec's intake design separates rain or moisture from the air stream before it enters the engine.
- The snorkel body is manufactured with a smooth inner wall allowing uninterrupted air flow to assist engine performance.
- Moulded from high quality UV-resistant polyethylene for maximum strength and rigidity and incorporating stainless steel hardware.
- A wide range fits most popular 4WD makes and models.
- Easy installation minimising modifications to vehicle's original components.
- Designed exclusively for TJM and supplied through the TJM Australia wide and International Sales and Service Network.

TJM XGS 4WD suspension

YEAR **3** WARRANTY
50,000 km

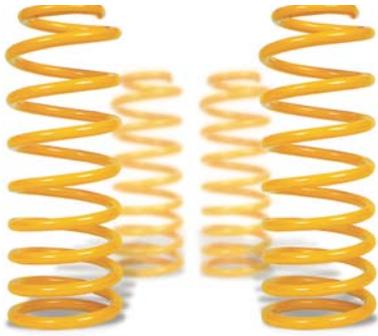

TJM XGS struts & shocks

TJM XGS 4WD Suspension have a number of kits available for the Toyota 200 Series, to meet specific needs. Towing, load carrying and ground clearance can all be improved while still retaining ride quality.

POLYAIR SPRINGS SYSTEM - Coupled with TJM XGS Springs and Shock Absorbers, the Polyair Spring further assists in solving suspension problems and greatly improves handling, ride height and stability of your vehicle. A pressure increase of between 5 to 25psi (Red Bag) or 10 to 100psi (Black Bag) will give a load increase of between 10 to 60%.

TJM XGS coil springs

TJM XGS Coil Springs are available in linear and progressive designs for most applications. They also come in various heights and load carrying capacities to enable the optimum suspension system to be achieved. TJM XGS Coil Springs are manufactured in Australia, using BHP steel, and when matched with XGS Gas Charged Shock Absorbers enhance ride, handling, performance, articulation and off-road ability.

TJM XGS Coil Springs are manufactured to exacting specifications on computer-controlled coiling machines, then shot peened, load tested and supplied in a durable powdercoat finish. TJM XGS Coils are covered by an exclusive 3 year or 50,000 Kilometre Warranty. TJM XGS Coil Springs are available in standard height, raised or extra heavy duty.

See TJM XGS Suspension Brochure for more technical information and a look at our complete XGS Suspension Range.

TJM have a range of recovery equipment including:

- Recovery straps
- Drag chains
- Recovery bags & kits
- Bow & 'D' shackles
- Tow hooks
- Air jacks
- Hand winches
- Recovery jacks
- Snatch blocks
- Compressors

TJM OX recovery equipment

TJM OX recovery winches

TJM OX ELECTRIC WINCHES

TJM has a range of electric winches to suit almost any need. The electric winch range can easily be fitted into any winch compatible bar and feature a positive braking mechanism to prevent the winch from allowing a vehicle to slide back down a hill when the user isn't engaging the winch. Each winch includes cable, winch controller and roller fairlead as standard.

TJM OX HYDRAULIC WINCHES

The power and strength of the TJM 10,000lb Hydraulic Winch is harnessed through the vehicle's hydraulic system. The unique solenoid valve overrides the winching function should a change in steering direction be required. The hydraulic system allows the winch to operate for extended periods under load, providing constant and smooth recovery power. The patented two-speed TJM winch allows for fast rope retrieval on one speed while the other speed provides strong recovery capacity.

TJM OX HAND WINCHES

Capable of a pulling 2500kg the TJM Ox Hand winch can be used at any angle and is not restricted in rope length. Its design enables the wire rope to be fed through a set of wear resistant locking jaws by a single operating lever. The locking force on the wire rope increases as the load on the hand winch increases.
